Power Controllers

Power Supply Description:

Power control unit is extremely efficient and designed for long term permanent installation. Constructed of fine copper material, and has a very stable output pure sine wave electrical output. The operating temperature is very low and suitable for various environments. Integrated circuit board that utilizes a self recovery system designed to cut the power by itself when overloaded.

This system will auto restart when overload or short is corrected.

Rated Ampere: 1.5A
Input Voltage: AC 110-120 VAC
Output Voltage: AC 48 VAC
Size: 2.5" x 6.5" x 2.5" or 63.5mm x 165.1mm x 63.5mm

NOTE: Each piece of material requires a dedicated power line from the output side of the power control unit to the material to properly function. Contact your electrician or electrical contractor for any electrical installation questions.

All power control unit options can be custom tailored to meet any project size or applications
Includes RF Remote Control
Dry contact relay input compatible for all 3rd party control systems such as Crestron, Lutron, Savant, DMX, etc.
